

So what to expect, it was year twenty-one
And if you look close you will find we had fun

All winter my parents did projects galore
I have no idea why they answered the door

When snow blew outside, they crafted for me
Now I have the maps that teach geography

And Ken and Lisa sold the house on the lake
A real estate boom and they sure did partake

A new neighbor came, their dog tackled mom
They're often not there so most days are calm

And then Biden did, just what we thought
He opened the borders yelled "RUN! don't get caught"

And speaking of run, Lilly joined the track team
Got busy in school with a full head of steam

She took several classes to graduate early
And practiced her driving in her little car pearly

And then to the prom and a date with the king
and that's when I knew we were headed toward spring

Ben finished up strong, his first year at LU
Came home to the farm and a long list to do

And while Lilly sat and watched at the pool
Ben bought a Fiero it is pretty cool

And finally June came, school year was a joke
I wouldn't go back, but I know I'd go broke

So we packed up the cars, the summer's begun
And the beach without masks was a whole lot of fun

One day in the sand then took off for a party
I left kinda late and we were almost tardy

We sped down that road and turned into the farm
And whatever Chad did, it worked like a charm

Page was right there, so pretty in white
They got all hitched up and partied all night

So when we got home, we built a new room
To exercise someday, or at least I'd assume

We're so proud of Lilly, passed her driver's test
That's probably the reason for this pain in my chest

I'm only kidding she's good at the wheel
And she takes such good care of that automobile

She had a great summer and it only got better
When I went to the mailbox got a college letter

She's joining her brother down south in the fall
I can't wait to visit and watch some football

Our house won't be empty, see Lilly fixed that
Thinking only of us she took in a stray cat

It was just in time cuz our dog almost croaked
and when the bill came I nearly choaked

She pulled through her trouble, it was probably just gas
Now I always scold her when she tries to eat grass

But as for our Lilly this must be her year
The queen of homecoming is with us right here

And Luke fixed his house and worked on his car
but as for right now he won't be a sports star

He hops on his crutches his tendon blown out
He will soon recover and that is no doubt

And as for his brother Seth shoots at the ducks
While Lindsey hordes cats and the chickens that cluck

And finally Paul found a place to call home
They lock all the doors so the patients don't roam

It's good he has Kristy she cares for her dad
She calls and she visits and that makes him glad

And now we look forward to the year twenty-two
I wonder what God has in store for this crew
