

2020

**I'll try to put this year in some light
But Look at the news and nothing went right
I should have known we were in for bad luck
When the wheels finally fell right off my old truck
And it feels kinda crappy when you know you were cheated
Liberals took over and good was defeated
China made COVID, the media blamed Trump
Colby crashed when his chopper went thump
Then volleyball season was cancelled this year
And the kids all went home to zoom out of fear
No class trip, no prom, they locked us inside
Wolfe threatened arrest or at least he tried
Business' closed and we all got a check
that sent the economy to a spiraling wreck
California caught fire and Australia too
CNN grinned and that's when we knew
It was too hard to hold it and fake their concern
When all that they want is America to burn
Their faces lit up but they tried not to smile
When black lives matter started to rile
They burned their own cities and beat up the cops
While defunding dems were licking their chops
They clearly just wanted to take the White House**

While Biden was hiding like a weak little mouse

So now that I got all that off of my chest

I'm ready to focus on what makes us the best

When the country shut down and the school year got canned

I started building a most awesome tree stand

I bought a new truck at least new to me

Truck's are expensive... nothing for free

I put up a fence between me and Mike

A private back yard just what we like

So we had a party cuz Ben graduated

got a big tent and then decorated

he bought some new rims and lifted his truck

And when COVID raged we tried out our luck

Went to the ocean it was a good week

until Kate went to Charlotte with tears on her cheek

We missed her so much, but what could we do

She was headed to Clemson and Ben to LU

And as for our Lilly she worked at the pool

She saved all her money, cuz she aint a fool

We drove her to Hershey came home with her car

A nice shiny Juke looks like a rock star

Then Seth married Lindsey adopted the chickens

while Duke ate the couch he is quite the dickens

And speaking of Schmidt boys there's no reason to fear

Chad flew from the nest and started a career

he drove cross the country and blew up a van

Then settled near Page.... That was surely his plan

And guess who's a homeowner.. the Incredible Luke

When he makes his first million it won't be a fluke

He uses the hammer and installs windows too

And won't stop before the hard work is through

Lisa caught COVID but still she is living

A real lame excuse to cancel Thanksgiving

We remodeled the basement got rid of the fish

Our internet works so the Blecks got their wish

And this year got better when I shot a big buck

It took three to lift him he filled up my truck

And Ken dug a pond he shot a rack too

Can't say that COVID left us nothing to do

Dad fixed all my stuff and built our new table

He'll work till it's done or until I am not able

And mom keeps on sewing and cooks up the deer

She sits near the fire no Florida this year

And finally its Kristy she keeps us all hoppin

The bills and the laundry and grocery store shoppin

This year has really been no easy task

**Especially now its all done in a mask
So hope for the future is God is in control
Over our nation, our heart and our soul
So look up to him and stay worry free
For God holds our wealth, our health and safety**
