

2002

It's funny how centered life was around you and me

We weren't even thinking of our own family tree

Now that our branch in the tree has grown

In a direction only God has shown

Diapers and doctors, but no more bopper

Sippy cups, wipes and a good friend Flopper

All these new words and our schedule times ten

And now you can see our life's about Ben

I see what they mean now, whenever they say

They grow up so fast so enjoy everyday

It's hard to believe almost two thousand and three

And that should remind us to enjoy the whole tree

We need to slow down run less like a chicken

If we don't we won't know what were missin

So while were thinking of number two

And our life looks more like a zoo

Let's not forget we still have you and me

And plenty of love to spread among three
